

Initial action plan

Template to fill out and share

This document allows you to formalize your first eco-production actions, clarifying them and sharing them with your team.

This simple plan will help you to:

Structure the approach from the outset,

Clearly assign responsibilities,

Keep up with deadlines without losing sight of the goal.

We recommend that you include 3 to 5 priority actions that can be easily activated on your next project.

Action to be implemented	Responsible	Expected deadline	Status (to be continued)
<i>Example: Install a water point to avoid using bottles</i>	<i>Eco-production Coordinator</i>	<i>Before preparation</i>	In progress

Some usage tips

Share this table at the pre-production meeting.

Print it out or integrate it into a collaborative tool (Google Sheet, Notion...).

Update it regularly: it's a living management tool.

- Make it a point of reference during progress reviews.
